

Appendix No. 1 - Price list of EV-Charging services for charging clients

Introduction

Smart Fuel Pass s.r.o. is the operator of the universal, fully digital Smart Fuel Pass system, which provides comprehensive management of chargers for electric cars (EV-Charging stations), coupled with fully integrated payment functionality, a localization module and online navigation. The system provides full management of:

- Payers
 - Persons
 - Companies
- Payers in the environment of companies and their employees
 - Fleet management
 - Management of buyers
- Merchants (recipients of payments)
- Sales points
- Payment terminals
- Products and services
- Prices, individual discounts, intermediary commissions, commission fees
- Price tariffs
- Financial accounts
- Credit limits
- Payments using the card payment gateway
- Client and merchant contracts
- Automatic invoicing

The means of payment as well as the payment terminal is a mobile phone and the Smart Fuel Pass payment application.

The system provides two user interfaces for both payers and merchants:

- Mobile application
- Web interface - portal

SmartFuelPass – is a full-fledged solution for charging electric cars, where the customer can register electronically and after a simplified verification of his identity, he has his own profile, where he can manage:

- users within their profile - managers
- companies on behalf of which he is authorized to act
- users within their profile – drivers, including security limits for making payments
- means of payment – mobile phones
- financial accounts
- and much more

Reports, a graphic dashboard and reports related to transactions in the mobile application are available. Data is displayed in the system depending on the user role.

A significant advantage of the SmartFuelPass model is ultra-modern internal roaming, in other words, the possibility of charging an electric car at the chargers of various charging network operators.

A unique feature of the system is the possibility of receiving rewards for recommending the system to other users, the so-called Referral¹.

SmartFuelPass model price list

The pricing policy in the SmartFuelPass program is based on a transaction fee. All fees are billed and payable as set forth below.

All fees are listed without VAT. The relevant VAT will be charged in the relevant items.

EV-Charging platform services

The Smart Fuel Pass - EV Charging service is provided in the form of SaaS (Software as a service).

¹ Explained in the Rewards chapter

No.	Description	Price	Price unit	Settlement date
1.	Right to use the platform	Free		
2.	Activation, registration fee	Free		
3.	Web interface - portal	Free		
4.	Mobile application	Free		
5.	Consolidated invoicing ²	Free		
6.	Issue of RFID charging card	6 €	Per piece	After issuing
7.	Blocking of a lost or stolen RFID card at the client's request ³	5 €	For the act	Immediately

Financial services charged by the Payment Institution ⁴

As the integrated functionality of the system is a digital payment wallet and the financial settlement of transactions, the system requires the maintenance of financial accounts in a licensed payment institution. Fees may be associated with maintaining and using a financial payment account. For easier orientation, we present them informatively below.

No.	Description	Price	Price unit	Settlement date
1.	Management of the client's financial personal account	Free		
2.	Management of the client's financial account, a legal entity	Free		
3.	Cash deposit to a bank account	Free ⁵		
4.	Top-up of a SEPA payment account by transfer from accounts outside the ecosystem of the Payment Institution for a top-up amount of 25 € (or the equivalent in another currency according to the exchange rate published on the SmartFuelPass website) and more	Free		
5.	Top-up of a SEPA payment account by transfer from accounts outside the Payment Institution's ecosystem for a top-up amount of up to 25 € (or the equivalent in another currency according to the exchange rate published on the SmartFuelPass website)	0,25 €	For each transaction	Immediately
6.	Top-up of a payment account via the payment card gateway for a top-up amount of 25 € (or the equivalent in another currency according to the exchange rate published on the SmartFuelPass website) and more	Free		
7.	Top-up of a payment account via a payment card gateway for an amount up to 25 € (or the equivalent in another currency)	0,25 €	For each transaction	Immediately
8.	Account top-up by credit limit	Free		
9.	Internal transfer between own accounts in the Payment Institution's system	Free		
10.	Internal transfer between foreign accounts in the Payment Institution's system	Free		
11.	Outgoing payment outside the Payment Institution within the EEA	0,25 €	For each transaction	Immediately
12.	Other outgoing payment e.g., foreign payment	Individual		

² In the form of PDF or XML

³ Blocking of the card by the operator based on the client's instruction. The client can still block the card through the portal himself, free of charge.

⁴ Payment institution means the company Ultima Payments a.s., Panenská 13, 811 03 Bratislava, Slovakia

⁵ It does not include costs charged by third parties such as banks. This fee may be charged separately at the time of the transaction, depending on the bank, as some banks charge fixed fees for the transaction regardless of the amount of the transaction.

Other services of the Payment Institution associated with maintaining a financial account

No.	Description	Price	Price unit	Settlement date
1.	Electronic account statement	Free		
2.	Cancellation and refund	30 €	For payment	Immediately
3.	Electronic confirmation of payment	Free		
4.	Account statement in paper form	5 € + 1 € for each sheet A4		After sending the statement
5.	Confirmation of payment in paper form	9 €	For a confirmed transaction	After sending the confirmation
6.	Sending a statement or payment confirmation by post	1,50 € + postage costs	For a statement	After sending the statement
7.	Sending a statement or confirmation of payment by email	1,50 €	For a statement	After sending the statement
8.	Crediting an insufficiently identified payment	5 €	For crediting the payment	After crediting the payment
9.	Unidentified payment refund	30 €	For payment	Immediately
10.	De-activation/activation of the means of payment at the client's request	9 €	For each deactivation/activation	After deactivation/activation

Rewards

Each Client is assigned a unique string. This string can be integrated into links (URLs) for e-marketing or e-onboarding. Subsequently, thanks to this string, the system can identify through which existing Client the new Client or new Merchant registered in the system. Referral and Referral Owner link will be created between them (see GTC for details). When a Referral makes a payment, the Referral Owner receives a reward according to the following table:

No.	Description	Price	Price unit	Settlement date
1.	Reward For payment for electric car charging services (EV-Charging)	0,90%	From the total value of the transaction	quarterly
